EDUCATION

The Ohio State University, College of Engineering **Columbus, OH**
Bachelor of Science in Electrical and Computer Engineering *Grad Month 2029*

- Sub track: Computer Engineering
- GPA: 3.65/4.00
- Recipient of the Honda-OSU Scholarship
- Autumn 2025 Dean's List

WORK EXPERIENCE

YouTube **Columbus, OH**
***Content Creator**– Iwindowl* *8/22 – Current*

- Built and grew a 1.89M-subscriber YouTube Shorts channel by consistently creating high-engagement Roblox content and analyzing audience trends
- Self-taught video editing, ideation, and content strategy, publishing on a regular schedule optimized for platform algorithms
- Generated $29,000+ in ad revenue, demonstrating monetization strategy, analytics awareness, and digital marketing skills

PROJECTS

Battleship Math Game | ENGR 1181 Software Design Project **Columbus, OH**
ENGR 1181 Software Design Project *11/25-12/25*

- Built a MATLAB Battleship-style math game using a tile-based graphics engine with a 10×10 grid, CPU opponent, animations, and win/loss logic
- Designed interactive gameplay where correct answers to multiple-choice math problems confirm hits, turning arithmetic practice into engaging play
- Collaborated with an ENGR 1181 team to create a fun, kid-friendly learning tool that makes math feel less like homework and more like a game

OSU Gym Time Predictor **Columbus, OH**
Hack OHI/O 2025 *10/25– 10/25*

- Developed a web app that predicts gym crowd levels at OSU using simulated swipe-in data.
- Modeled 3000+ randomized user swipes per time slot to estimate peak and off-peak hours.
- Built an interactive interface that tells if gym is crowded or not.
